Oct. 1, 1968

Dear Dr. Lederberg;

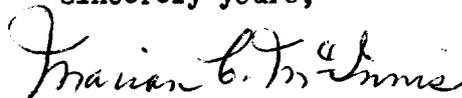

The enclosed clipping from our local paper is the article I referred to in our telephone conversation this morning and which you asked me to mail to you.

I have marked the paragraph in error. There is no suppression of the egg when the Rythm System is practiced. The egg if fertilized is not aged as it could very likely be if one is using medication to check ovulation.

This is very important information and I do want to see that our newspaper carries the correction on it.

Thank you for your personal and courteous attention to my call.

Sincerely yours,

Marian C. McInnis
